KENO

GUIDE

WIN \$50,000

NORTHERN  QUEST
RESORT & CASINO

WHAT IS KENO

Keno is played using eighty (80) balls, numbered one (1) through eighty (80), which are held in a large bowl. A blower mounted underneath the bowl mixes the balls and sends twenty (20) of them, one at a time, into “a wheel.” As the numbered balls are selected, the corresponding numbers are lit on the keno display boards located throughout the casino for your convenience. The twenty (20) numbers displayed in the wheel and journal logs are the only official results of that game.

Payouts are determined by the number of matches that have been made. Consult the pay tables to determine your winnings.

Any Keno attendant or runner will be glad to check your tickets. Tickets can only be cashed out after your last game has been played.

KENO RUNNERS

Keno runners are for your convenience and are available throughout the Casino. **The Casino cannot be held responsible if your tickets are too late for the current game or if the runner is closed out of a game.** Keno runners make two trips per ticket; one to pick up tickets and the second is to deliver tickets to guests. Runners will do the best they can to get you in the next possible game. If no runners are available, please visit the Keno Counter.

NOTE: Runners are instructed not to wait for guests that are not ready for the current game. Place your tickets/money where runners can see them. Please check your tickets for accuracy when they are delivered.

QUESTIONS OF HOW TO PLAY KENO SHOULD BE ASKED AT THE KENO COUNTER.

You may replay your ticket instead of making a new one with the same numbers. Just present your official ticket to any Keno writer or runner after the completion of all your games. They will generate a duplicate ticket with exactly the same information from your previous ticket for the next game or games you wish to play.

HOW TO PLAY KENO

- 1 Pick your numbers. "X" out your choice of numbers on the top and/or bottom of a blank Keno ticket. You can mark from 1-15 numbers for \$1 and up to \$500 or 20 numbers for \$5 per game. These marked numbers are called "spots."
- 2 Mark the number of games you wish to play using your chosen numbers in the area marked "Number of Games." You can play from 1-1,000 games.
- 3 Write the amount of your wager in the box marked "Price per Game."
- 4 Multiply the number of games you wish to play with the price per game and place this total in the box "Total Price All Games."
- 5 Write the number of spots you are playing in the right hand margin of the ticket. Be sure to include the special game designation if you are playing anything other than a straight ticket. Otherwise the ticket will be written as a straight spot ticket.
- 6 Write your Camas Rewards number in the right hand margin of the ticket above "Acct Number." Keno pays Six (6) points for every dollar played, so use your card!

Our Keno staff is here to serve you. If you wish any Keno information or need help in the explanation of a ticket, please don't hesitate to ask.

REGULAR RATE

The minimum bet is \$1 for your choice of numbers from 1 to 15 spots. You may increase your wager in any amount up to \$500 for a single game. You may play as many tickets on each game as you wish.

SINGLE GAME TICKETS

Single game winning tickets must be claimed within 24 hours.

MULTI-RACE GAMES

You may play the same numbers on consecutive games.

2-20 games – You have 24 hours after the completion of your last game to collect.

21-1,000 games – You have 360 days from time of issue to collect your winnings.

MULTI-RACE BETS

If you play 10 games or more, you may play for 50¢ per game (half the dollar payout applies).

If you play 50 games or more, you may play for 25¢ per game (one-fourth the dollar payout applies).

Please check your ticket for accuracy. Your ticket is your receipt. Any errors must be corrected before the start of the next game. Tickets cannot be changed or voided after they are entered into play. You must complete all games wagered before you can collect any winnings.

Earn points every time you play by using your Camas Rewards Card. Not a Member yet? Visit the Camas Rewards Center or see any gaming attendant to start your free membership today.

THE MAXIMUM AGGREGATE PAYOUT ON ANY SINGLE GAME OF KENO IS \$50,000.

WAY TICKETS

Way tickets are an exciting way to play Keno and are not as difficult as they look. They are a favorite among experienced Keno players. It's actually like playing several tickets on one ticket. One group of numbers works with another group or groups to make up the different ways. Each combination of groups acts like a separate ticket for payouts. There are literally hundreds of different combinations you can play on a way ticket. Wagering is different as well. Since there are so many ways to play a ticket, bets can be made at a lower minimum per way.

IF YOU PLAY	MINIMUM WAGER
-------------	---------------

- | | |
|------------------|-------------|
| 3 ways or more | 50¢ per way |
| 10 ways or more | 25¢ per way |
| 100 ways or more | 10¢ per way |

Of course you can always wager more if you wish.

NOTE: In order to be considered a WAY TICKET and qualify for the lower wager rates, the groups you select MUST work with each other to form different groups. Playing a ticket with just three 3-spots, or four 2-spots and nothing else is NOT considered a WAY TICKET and must meet our regular game Keno requirements.

HOW TO PLAY WAY TICKETS

- 1 We chose numbers: 3, 8, 10, 25, 54, 72 for our ticket. So far, we have a 6-spot.
- 2 Let's divide our 6 numbers into three groups of 2 numbers in each group. Now we have one 6-spot and three 2-spots.
- 3 We also have three groups of 4-spots on this ticket. The A-B-C indicate how the 2-spot groups form three 4-spots. A+B is one group. A+C is another group. And B+C is our third group.

The total number of ways on this ticket is seven and is actually like seven tickets in one. There are three 2-spots, three 4-spots and one 6-spot. You are now ready to write the conditioning in the right hand margin.

Now place your wager. You may bet \$1 per WAY (this ticket would cost \$7) or you may wager 50¢ per WAY since this ticket has 3 or more ways. When you play 50¢ per way, the payout will be one half of the \$1 rate on the pay tables.

3

This ticket becomes a winner based on the pay rates for each way. ANY or ALL combinations of these groups win.

- 6-spot Three or more numbers hit will pay
- 4-spot Three or four numbers in a group will pay
- 2-spot Two numbers in any one group will pay

KING TICKETS

A single number circled as a group of one is called a "KING." The more KINGS you circle, the more ways you have to win. On this example, we chose five different

numbers and circled each one. We now have one 5-spot. We are also going to play the 4-spots. If we hit any four of the five numbers we picked, we will have hit a solid 4-spot PLUS 4 out of our 5-spot.

TICKET OF THE STARS

The famous 190 WAY eight. This ticket has over 100 ways to win, so the wager may be made at 10¢ per way. All eighty numbers are played by separating them into twenty groups of four numbers in each group. Each group of four will go with all the other groups of four to make 8-spots. If you hit all four numbers in one group and all four numbers in another group,

you have hit a solid 8-spot. If you catch all four numbers in one group and three in another group, you have hit seven out of eight. Payouts are 1/10 of the regular \$1 eight spot rate.

HOT/COLD FREQUENCIES

Want to know what numbers are hitting? Ask the Keno Attendant to print a frequency report. You decide how many games you want to go back (maximum of 300 games).

RULES

Please check your ticket for accuracy.

Your ticket is your receipt. Any errors must be corrected before the start of the next game. Tickets cannot be changed or voided after they are entered into play. You must complete all games wagered before you can collect any winnings.

Multi-race tickets 2-20 games have 24 hours after your last game is called to collect winnings. After 24 hours, it will be erased from the computer. Tickets can only be cashed out after your last game.

Multi-race tickets 21-1,000 games must be claimed within 360 days from the time of issue. Tickets can only be cashed out after your last game.

\$50,000 aggregate payout - Total maximum payout on any game is \$50,000. This is the maximum payout to all winning players on a single game.

PROBLEM GAMBLING?

Northern Quest is committed to supporting responsible gaming. If you or someone you know has a gambling problem, please call the Washington State Problem Gambling Helpline at 800.547.6133 or Camas Path at 509.789.7630.

WIN \$50,000 PLAYING KENO

IT'S AS EASY AS 1,2,3!

- 1 Pick your favorite numbers and cross them off (X) on a blank keno ticket. Pick up to 15 numbers on any one card.
- 2 Mark the number of games you want to play in the "number of games" box. You can play 1-1,000 games.
- 3 Write the amount you want to bet in the box marked "price per game," minimum \$1 per game. Multiply the bet amount with the number of games for the "total price of all games."
You're done!
